Five Completed Kitchens

Each kitchen we design begins with a conversation — about how a family cooks, gathers, and lives. This portfolio presents five completed projects delivered in 2026 by IBEK Kitchen . Every commission is a bespoke collaboration: materials are chosen for their tactility and longevity, hardware for its precision, and layouts for the specific rhythms of each household.

Five Kitchens. Five Stories.

KITCHEN 01 ·

Anas Qatatsheh’s Kitchen

Cream Matte Lacquer · Dark Walnut · Calacatta Gold Quartz

"Warmth without compromise"

This U-shaped kitchen pairs cream matte lacquer fronts with dark walnut laminate upper cabinets and an island cladding. The layout wraps around a central island dining table, creating a natural gathering point. LED-lit coffered ceiling panels bring soft ambient light that shifts with the day. Black appliances — built-in oven, integrated dishwasher, French-door refrigerator — sit flush behind handleless facade panels for a seamless elevation.

KITCHEN 01 ·

The kitchen countertops are finished with **high-quality quartz**, offering excellent durability, heat resistance, and easy maintenance. The cabinet finishes are made from **Spanish laminate by Finsa**, providing a premium wood appearance with high resistance to daily wear. All hinges and hardware are supplied by **Hettich (Germany)**, ensuring reliable performance, smooth operation, and long-term durability.

KITCHEN 02 ·

Farah Manasra

Greige Matte · Warm Walnut · Nero Marble Island

"Quiet luxury, precisely calibrated"

The Farah kitchen is built around a powerful material contrast: cool greige matte lacquer on all cabinet fronts meets warm walnut veneer panels in the open-shelf cooking alcove — lit from within by recessed LED strips. A Sub-Zero built-in refrigerator is framed by walnut panels, dissolving it into the composition. The island countertop in nero polished stone reads as a dark mirror surface, reflecting the warm ceiling light. Black leather dining chairs complete the composition with understated sophistication.

KITCHEN 02 ·

The kitchen countertops are finished with high-quality quartz, featuring a black quartz island and a white quartz worktop with subtle grey veining, offering excellent durability, heat resistance, and easy maintenance. The cabinet finishes are made from Spanish laminate by Finsa in warm walnut wood and Greige Softmatt (a warm neutral tone between grey and beige), providing a refined and contemporary appearance. All hinges and hardware are supplied by Hettich (Germany), ensuring reliable performance, smooth operation, and long-term durability.

KITCHEN 03 ·

Salah Dogmosh

Matte Black · Warm Walnut · Calacatta Marble Waterfall

"Drama in every surface"

The Salah kitchen is a study in bold commitment. Matte black fronts — fully handleless — cover every cabinet and tall unit, broken only by a warm walnut cooking alcove that glows with LED backlighting. Ribbed glass display cabinet doors add materiality and transparency. The island is wrapped floor-to-ceiling in with a full waterfall edge — the most dramatic single element in the project. Three oversized black industrial pendant lights define the kitchen's social centre above the island bar.

KITCHEN 03 ·

The kitchen countertops are finished with high-quality quartz in white with elegant grey veining, featuring a waterfall island that creates a seamless, contemporary appearance. The cabinet finishes are made from Spanish laminate by Finsa in warm walnut wood and Nero Softmatt black, combining natural warmth with a sleek, modern aesthetic. All hinges and hardware are supplied by Hettich (Germany), ensuring reliable performance, smooth operation, and long-term durability.

KITCHEN 04 ·

Muhannad Al-Rahal

Olive Walnut · Charcoal Matte · Dark Granite Island

"Organic richness, grounded in warmth"

This open-plan kitchen integrates seamlessly with the living space beyond — a composition of warm olive-walnut wood fronts, dark charcoal matte island panels, and a rich dark island surface. Cabinet fronts across the full L-shaped run display an olive-toned walnut with natural character and subtle knot variation. The island is two-toned: walnut cladding on the visible faces, charcoal matte panels on the dining side. Warm golden LED under-cabinet strips and track lighting create a sunset glow across every surface.

KITCHEN 05 ·

Akram Al Rawajfeh

White Matte Lacquer · Walnut Accents · Curved Display Column

"Elegance through curvature"

The Akram kitchen is defined by its architecture: curved column display cases flank the entry, framing the kitchen as a destination. White matte lacquer fronts throughout — clean, spacious, luminous. Walnut wood appears as punctuation: the hood cladding, display cabinet frames, and feature wall behind the cooking zone. The curved display column with integrated LED and glass shelving is a bespoke joinery piece — neither pure kitchen nor pure furniture, but something in between.
